Experience

EGDK

Aug 2024 – Present

Software Engineer

Mangaluru, India

- Built enterprise-grade full-stack systems using **ASP.NET Core**, **Blazor**, **Entity Framework**, and **MSSQL**, improving operational workflow efficiency through automation.
- Developed AI-powered backend services using **Python**, **FastAPI**, **AWS Lambda**, and **LLM integrations**, reducing developer and support workload by **40%**.
- Engineered AI-driven GitHub Actions workflows for PR automation, contextual validation, and developer productivity improvements.
- Led implementation of scalable APIs, authentication systems, and enterprise dashboards, improving operational reporting and workflow efficiency.
- Optimized CI/CD pipelines, database operations, and backend workflows, reducing production defects by **30%**.

Projects

Zynergy | C#.NET Core, Entity Framework, Blazor, Azure, MSSQL

- Designed scalable backend systems and Blazor-based enterprise dashboards supporting real-time synchronization workflows.
- Optimized database operations and batch-processing pipelines, reducing latency by **35%** while improving throughput.
- Developed enterprise reporting and data consistency workflows for Denmark's Energy DataHub.

Zybot | Python, FastAPI, AWS Lambda, S3, MCP

- Architected modular AI-powered backend services for enterprise query processing and workflow automation.
- Integrated **Model Context Protocol (MCP)** to improve contextual reasoning and response accuracy.
- Deployed scalable serverless services using **AWS Lambda** and **S3** for high availability and cost-efficient deployment.

Technical Skills

Programming Languages: C#, Python, SQL, JavaScript, TypeScript

Backend Technologies: ASP.NET Core, .NET Core, FastAPI, Node.js, REST APIs, Entity Framework, Microservices

Frontend Technologies: Blazor, Razor Pages, HTML, CSS, JavaScript, SASS

AI & Automation: LLM Integration, AI Agents, GitHub Copilot, Claude Code, GitHub Actions, AI Workflow Automation, Model Context Protocol (MCP)

Cloud & DevOps: Cloud-Native Applications, AWS (Lambda, S3), Microsoft Azure, Docker, Kubernetes, CI/CD Pipelines

Databases: MSSQL, PostgreSQL, MySQL, NoSQL

Architecture & Systems: Distributed Systems, Event-Driven Architecture, Kafka, Multithreading, Design Patterns, Low-Level Design, High-Level Design

Tools & Platforms: Git, GitHub, Agile Methodologies, Jira

Achievements & Certifications

- Solved **300+** Data Structures and Algorithms problems across **LeetCode** and **GeeksforGeeks**.
- Microsoft Certified: **Azure Fundamentals (AZ-900)** and **AI Fundamentals (AI-900)**.
- Created AI-powered developer workflows and AI agents to streamline code reviews, engineering validation, and productivity processes.

Education

Master of Computer Applications (MCA)

Srinivas University – Dual Specialization in Data Science & Machine Learning

2021 – 2023

CGPA: 9.6

Bachelor of Computer Applications (BCA)

Karnatak University

2018 – 2021

CGPA: 8.97
